

Dataset Features Used in the Project

This project used a sales dataset from Vrinda Store.

The dataset contains customer orders, sales details, product information, and delivery details.

1. Order ID

What It Is

A unique number for every order.

Example

171-1029312-3038738

Purpose

Helps identify each order separately.

Used In Project

- Counting total orders
 - Order analysis
 - PivotTables
-

2. Customer ID (Cust ID)

What It Is

Unique ID for each customer.

Purpose

Identifies different customers.

Used In Project

- Customer analysis
 - Order tracking
-

3. Gender

What It Is

Shows customer gender:

- Men
- Women

Purpose

Used to compare purchases by gender.

Used In Dashboard

Created:

- Men vs Women sales chart

Insight

Women contributed higher sales.

4. Age

What It Is

Customer age.

Example

44

29

67

Purpose

Used to understand customer age groups.

5. Age Group

What It Is

A new column created using formula.

Formula

=IF(E2>=50,"Senior",IF(E2>=30,"Adult","Teenager"))

Purpose

Automatically categorized customers into:

- Teenager

- Adult
- Senior

Used In Dashboard

Created:

- Age vs Gender analysis chart
-

6. Date

What It Is

Order purchase date.

Example

04-12-2022

Purpose

Tracks when orders were placed.

Used In Project

- Monthly sales analysis
 - Trend analysis
-

7. Month

What It Is

Extracted from Date column.

Formula

=TEXT(G2,"mmm")

Result

- Jan
- Feb
- Mar

Purpose

Used for monthly sales charts.

8. Status

What It Is

Shows order status.

Example Values

- Delivered
- Cancelled
- Returned
- Refunded

Purpose

Tracks successful and failed orders.

Used In Dashboard

Created:

- Order Status Pie Chart
-

9. Channel

What It Is

Platform where product was sold.

Example

- Amazon
- Myntra
- Flipkart
- Ajio
- Meesho

Purpose

Analyzes which platform generated highest sales.

Used In Dashboard

Created:

- Channel contribution chart
 - Slicers
-

10. SKU

What It Is

Unique product code.

Example

JNE1233-BLUE-KR-031-XXL

Purpose

Identifies products uniquely.

Used In Project

Product-level tracking.

11. Category

What It Is

Product type.

Example

- kurta
- Set
- Saree
- Top

Purpose

Analyzes which product category sells more.

12. Size

What It Is

Product size.

Example

- S
- M
- L
- XL
- XXL

Purpose

Tracks customer size preferences.

13. Quantity (Qty)**What It Is**

Number of products purchased.

Purpose

Measures product sales volume.

Data Cleaning

Standardized:

- One → 1
 - Two → 2
-

14. Currency**What It Is**

Payment currency.

Example

INR

Purpose

Shows transaction currency.

15. Amount**What It Is**

Sales amount for each order.

Example

376

1449

453

Purpose

Most important column for sales analysis.

Used In Dashboard

- Sales charts
 - Revenue analysis
 - State-wise sales
 - Monthly trends
-

16. Ship City

What It Is

Customer delivery city.

Example

- Bengaluru
- Hyderabad
- Mumbai

Purpose

Location analysis.

17. Ship State

What It Is

Customer state.

Example

- Karnataka
- Maharashtra

- Telangana

Purpose

State-wise sales analysis.

Used In Dashboard

Created:

- Top 5 States chart
-

18. Ship Postal Code**What It Is**

Area PIN code.

Purpose

Location identification.

19. Ship Country**What It Is**

Country where product was delivered.

Example

IN

Purpose

Tracks delivery country.

20. B2B**What It Is**

Indicates business-to-business orders.

Example

FALSE

Purpose

Distinguishes:

- Business customers
 - Normal customers
-

Features Used in Excel Project

Using this dataset, the project created:

- PivotTables
 - PivotCharts
 - Dashboard
 - Slicers
 - Monthly analysis
 - Gender analysis
 - State analysis
 - Channel analysis
 - Sales insights
-

Final Goal of Dataset

The dataset helped:

- Understand customer behavior
- Analyze sales performance
- Identify top channels
- Find top states
- Generate business insights
- Create an interactive Excel dashboard
